

Abstract

The present invention provides a low-irritant
pesticidal emulsifiable concentrate comprising (a) 1 to 60%
5 by weight of at least one pesticidal active ingredient
compound selected from the group consisting of pyriproxyfen
and a pyrethroid compound, (b) 2 to 15% by weight of at least
one surfactant and (c) 15 to 90% by weight of at least one
aromatic ester solvent represented by the formula:

or the formula:

[wherein R represents non-aromatic group having 1 to 6 carbon
atoms; Ar represents an aromatic group; and X represents a
single bond or an alkylene group having 1 to 6 carbon atoms].

20 The pesticidal emulsifiable concentrate of the present
invention can be used as an emulsion which is superior in
emulsion stability when using after diluting with water, and
has low irritation.
